Stella Child is the Science and Technology Research and Grants Manager at The Good Food Institute (GFI) Europe. GFI Europe is an organisation focused on accelerating the transition to a more sustainable food system through supporting the development of plant based, cultivated, and fermentation-made meat, eggs and dairy products. Prior to joining GFI, Stella was based at UK Research and Innovation, the national research funder in the UK. She earned her PhD in chemistry at the University of Adelaide and undertook postdoctoral research at Vanderbilt University, working on novel enzyme chemistry and biosynthesis.
