

Dr. Marwen MOUSSA is Associate Professor at AgroParisTech in the field of food and bioprocess engineering. He is deputy coordinator of the FIPDes-Food Innovation and Product Design-Erasmus Mundus Joint Master Degree. He obtained a Ph.D. in food process engineering from AgroSup Dijon (University of Burgundy-France) in 2009. He belongs to “Microbial, Separation and Stabilization processes” research team for “Paris-Saclay Food and Bioproduct Engineering Joint Research Unit (SayFood)”. His research activities deal with integrated separation processes and bioprocesses intensification, with a focus expertise on membrane-based processes (membrane contactors and pervaporation). He is author of 23 scientific publications in international journals, 8 book chapters, 1 international patent and more than 80 communications and conferences. He is reviewer for several international journals (Sep. Purif. Technol; J. Memb. Sci., J. Chem. Technol. Biotechnol; Process Biochem;...)
